

SSL ASSIGNMENT NO. 1

(Introduction of self and SWOC analysis)

1. Self-introduction

Roll No : 23361

Date : / /2022

Hi! My name is Dhiraj Wadile. I am doing my Bachelor of Engineering from SCTR'S Pune Institute Of Computer Technology in Pune and my specialization in Information Technology. I have interest in flutter application development as well as in full stack web development and I have made project using the Java programming language during my first year in project based learning.

I did my schooling and higher secondary studies at my native place Shirpur in R.C.Patel Education Society. I want to become Chief Executive Officer of MNC's like Google, Microsoft and Meta etc. Thank You.

2. SWOC analysis of short- and long-term goal

Roll No : 23361

Date : / /2022

Short Term Goal : I want to master C++ and want to go deep in Web Development

Strengths : I enjoy solving tough and logical questions which I think is my strength .Once I get focused on something , I always give 100% on it.

Weakness : I get demotivated if I am unable to solve problems.

Opportunity : I am part of the CSI club , in which they arrange a lot of seminars related to programming. Learning from their mistakes saves a lot of time . I have enrolled in C++ SIG in PCSB CSI club, which is a great opportunity to learn from seniors who are already advanced in C++ language.

Challenges : In C++ there are too many concepts , which I think will be challenging for me, because remembering all those concepts for the long term requires a lot of practice and revision.

Long Term Goal : I want to do M-Tech in one of Top 7 IITs and further that want to go in the Entrepreneurship Field .

Strengths : I am good at Math and an exam like GATE (*Entrance Exam to get into IITs for M-tech*) requires more logical and critical thinking which I have built over the years.

Weakness : I am a bit lazy and I tend to avoid revision which can harm me in the long run.

Opportunity : My cousin has just cracked the GATE exam with AIR 128. I have a lot of guidance from him, also there are many seniors in my network who are preparing for it.

Challenges : I have to revise what I learn on a daily basis . I can recall the learned part after a long time also but because of which I generally ignore the revision part.
